Wall-Street Business Strong in Spite of the Adverse Bank Statement

Nearly \$13,000,000 Shipped West During the Week to Help Out the Banks-Heavy Increase in Grain at Indianapolis.

THE BOND MARKET.

Railway Issues Were Strong on Sales Only \$548,000.

At New York, Saturday, money on call was nominally 3 per cent. Prime mercantile paper, 6@8 per cent.

Sterling exchange was steady, with actual business in bankers' bills at \$4.84% @4.85% for sixty days and \$4.86% @4.87% for demand.

Probably the falling off in the money balances reported in the bank statement was larger than actual conditions warrant. The statement covers gold shipments of \$2,500,000 on Saturday and Tuesday, about a million paid to the subtreasury and something like \$5,000,000 transferred to the West-a total outflow of \$8,500,000, against \$9,688,000 reported in the statement. What is especially significant, however, is the statements record of \$12,485,600 decrease in deposits. This tells the story of the Western shipments. The exports of specie from the port of New York last week were \$1,692,405, of which \$1,005,500 were gold and

Speculation at the New York Stock Exchange Saturday was characterized by strength throughout the session. The success of the Northern Pacific funding plan as announced by President Oakes and the belief that the Richmond Terminal and National Cordage reorganization plans will be carried through, all added to the bullish feeling which set in after the subeidence of the excitement in Chicago early in the week. A leading trader who has contested the rise in the market for the past few days, and who began to cover up his purchases Saturday, was mainly instrumental in bringing about the advance which occurred. The bank statement, with its loss of \$6,566,600 in surplus reserve, was ignored, and after its publication a number of issues sold at the best figures of the week. The feature of the exhibit was the enormous loss in legal tenders of over \$9.000,000, which is due to the heavy shipments of currency to the interior during the week to help out weak financial institutions. The improvement in prices ranged from ½ to 3 per cent. Many stocks sold at top figures of the week and closed at or near the highest point. The market left off strong. The sales aggregated 138,612 shares, of which 19,636

Railway bonds were strong. The sales were \$548,000. Government bonds were steady. State bonds were dull. Closing

The New York weekly statement of the associated banks shows the following

Loans, decrease...... 2,290,000

 Epecie, decrease
 627,100

 Legal tenders, decrease
 9,060,900

 Deposits, decrease
 12,485,600

 Circulation, increase
 43,000

 The banks now hold \$14,429,000 in excess of the requirements of the 25 per cent. rule

Bar Silver-At New York, 82% o per onnce; et London, 38% d. LOCAL GRAIN AND PRODUCE.

The Trade of the Week in Most Lines Was

Satisfactory, with Prices Steady. The volume of trade in the week closing yesterday was very satisfactory nearly all departments, the drygoods houses, grocers and commission houses, especially, having been busy. In dry goods firmer prices prevail. In groceries all staple articles are in strong position, while in produce the tendency is to lower prices. Young chickens are 8 cents per pound lower than a week ago. Eggs are very firm at quotations. Strawberries are governed in price largely by the receipts of the day. Cherries are quite plenty and \$2 a bushel lower than a week a ago. New peaches are on the market, but are green and poor. Red plums are in good supply. Old potatoes are in light supply and firm at \$1.10 per bushel. New potatoes are coming in quite freely, and are easy at quotations. Florida tomatoes are off the market and Mississippi growth takes their place at four baskets for \$2, there being

onions are weak at quotations. In the local grain market No. 2 red wheat advanced I cent, corn ruled steady at Friday's quotations, and oats were off 12 cent a bushel. Indianapolis elevators on Saturday contained 114,057 bushels of wheat, against 43,976 last year for the corresponding date; 26,000 busnels of corn, against 6,928 last year, and 35,000 bushels of pats. against 33,234 last year. Track bids yesterday ruled as follows:

four baskets in a crate. Cabbage and

BRISK BUSINESS IN WHEAT

Reaction in Grain Pits Through Fear of the Government Crop Report.

Stocks of Wheat at Home and Abroad Largely in Excess of What They Were Reported This Time Last Year, Causing a Decline.

TRADING AT CHICAGO,

Transactions in Provisions the Lightest of Any Day on Record. CHICAGO, June 10 .- Fear of the government crop report was the main cause of a reaction in the grain pit to-day from the recent big advance. Business in wheat was brisk. The close was %c lower than on Friday. Corn was dull, closing with a decline of 4c for the day. Provisions were never before speculated in on so small a scale. The nominal closing prices are a trifle lower than yesterday. Bradstreet's figures helped drag the wheat market down at the start. The claim was that 90,-000,000 bushels of wheat would be on hand July 1, which would more than make good deficiencies in the crop, as damhad been greatly overestimated. It was said that stocks in America and in Europe and affeat for Europe were 167,000,000 bushels, or 70 per cent, more than last year, while the available supply of this country is now 89,000,000 bushels, against 41,000,000 bushels a year ago. The bank statement was also a depressing influence. An error in transmitting a quotation from Duluth proved quite a factor. From 62120 for July the next quotation was "62c sellers," and the trade here got very uneasy. The quotation was challenged, and a correction was made to 63c. This gave the market considerable recovery, and, at the same time, strong and higher cables were received. The feeling soon got quite enthusiastic, and prices went up cent very quickly, but the advance did not hold, the close being easy at 4c reaction from top figures. It is difficult to make much of a guess in the visible supply, but it is thought there will not be much, if any, change from last week, though it may possibly show a moderate decrease. The opening was easier and prices & @ sc lower than yesterday, ruled weak and further declined & @ sc, became stronger and advanced 4@ ic, the July future taking the lead. It then eased off, ruled steady and the closing was about %c lower for July and %c lower for September than yesterday.

Corn opened a fraction under the final quotations of yesterday, was steady for a while, then sagged off 4c, rallied 4c, ruled easier and at the close showed a trifle loss. There was a fair trade in oats and an easier feeling, prices averaging lower, and after a 2c range on the near future, closed steady on June and 2c lower for July. September held within a small range and closed with a net loss of 4c.

There was only trade in pork at \$20.25 for July and not a transaction in any other future. There was also a noticeable scarcity of operators in lard and ribs. What might have been the result of some more business it is impossible to guess. Compared with yesterday the nominal declines are from 10c to 20c in pork, from .0212c to .05c in lard and .0212c in July ribs. Freights to Buffalo were firm at 24c for wheat and 2e for corn. Estimated receipts for Monday are: Wheat, 25 cars; corn. 470 cars; oats, 300 cars; hogs, 23,000. The leading futures ranged as follows:

Options. | Op'ning Highest. | Lowest. | Closing. Wheat-June. \$20.25 \$20.25 \$20.20 20.80 10.15 10.20 10.72½ 10.72½ 9.47½ 9.50 9.75 9.77½

Sheep-Receipts, 5,700; shipments, 4,100. The market was firm and unchanged.

Handling Farm Produce. Country Gentleman. A great many products are injured by too much haadling; and with the crude methods used it can hardly be avoided. What is needed is an improvement in methods. The usual method of bandling potatoes, for instance, practiced by the majority of producers is to pick them up in baskets and empty them into pits or into the wagonbox, when they have to be handled again by hand or with a fork or shovel, and either spend a good deal of time in picking them up by hand or injure them and start decay by bruising them with shovel and fork. Mr. T. B. Terry, in his A B C of Potato Culture, tells us a better way.

For several years I have been using bushel boxes for marketing early potatoes while the skins slip, and for handling the crop in the field all through the season. This is one of the ways in which the potato specialist can get ahead of the small raiser. I think we handle our crop for less than half what it used to cost us before we got these boxes made. Our boxes are thirteen inches by sixteen, and thirteen deep, all inside measures. They were made a little deeper, to allow for shrinkage. The sides and bottoms are made of three-eighths stuff, and the ends of five-eighths. Handboles are cut in the ends.

The upper corners are bound with galvanized hoop iron to make them strong. The price paid for them was from \$25 to \$30 a hundred at a box factory. Some light wood should be used, of course, so as to make them as light as possible. They need not weigh more than six or seven pounds. Early in the season, while the skin sups. our potatoes are dug (not thrown) into these boxes, and the boxes are covered as fast as filled. They are then safe from sun standstill. Sales of a few lots of butcher | and rain till wanted for market. The about 15 by 18 inches. Dug one day and taken to market the next, and set off on the boxes at the grocer's, and then set by him into his delivery wagon and taken to his customers, the consumer gets them just as nice and tresh as though he raised them himself. Of course, these boxes tilled with potatoes should be carried on a spring wagon, and covered by canvas from sun

> and rain. Farmers Who Succeed. Farmers' Guide.

The prosperous business men are those Coffee - Options opened inactive and 4.35; shipping steers, \$4.40@5.00; native who labor least with their hands, and make unchanged to 5 points up, and closed quiet cows, \$3.00.25; butchers' stock, \$3.90.24.50; the head take the chief burden of the work.

stockers and feeders, \$2@4.40; bulls and | And this is true especially of those farmers who so manage their work as to dispense with the hardest labor by skillful use of all their opportunities. This is seen in those instances in which the improved methods of feeding cows, by soiling in the summer and ensilage in the winter, are practiced; by improved methods of culture, by which the yield of the crops is doubled; by those who cater to the more refined tastes of the public. The special farmers, the fruit growers, the fine butter-makers, the shepherds who supply the early lambs, those dairymen who use the best labor-saving machinery and utensils, those cattle-feeders who rear the finest beeves, those farmers who supply the markets with small pigs, fetching as much money at five monthsold as a two-year-old, but noteo well managed hog will do; all these are prosperous, and by the certain rule that to those who have the skill and take the thoughtful pains will always be the largest profits, they always will enjoy prosperity.
